WORK EXPERIENCE

Outlaw Technology May 2023-Nov 2026

Software Developer

- Coded web console features in Python and JavaScript for clients to manage cannabis inventory.
- Expanded user base by adding report tools and data syncs with API calls on AWS Lambda.
- Increased revenue by reproducing the tablet system to the console for direct plant recording.
- Built a backup option for the tablet and features for the scanner Android application in Java.
- Solved requests, issues, and slow loading by altering databases with MySQL and code with Git.

Paragon Data Labs July 2021-Dec 2021

Software Developer Co-op

- Collaborated with a 20-person backend development team on financial compliance software.
- Created actions in Java for clients to input information and set up email notifications.
- Reduced manual labor and time by automating the transfer of employee data to the database.
- Optimized the frontend interface by reviewing performance and user-friendliness.

PROJECT

Social Activism Platform Dec 2023-Feb 2025

- Established an open-source community platform for activists to improve their advocacy.
- Lead the backend development in a 3-person team for user profiles, posts, votes, etc. in Python.
- Verified user actions, such as following a post, with API endpoint calls and Django unit tests.

SKILLS

Languages: Python, JavaScript, Java, SQL
Technologies: HTML, CSS, Git, MySQL, AWS Lambda, Django
Software: Linux, GitHub, DBeaver, Postman

EDUCATION

Northeastern University, **Khoury College of Computer Sciences** Graduated April 2023
Bachelor of Science degree in Computer Science and Mathematics
